    Pass the metal hoop through the camera bracket hole and mount the camera on the pole.

Recommendation
Install the camera
about 2.5-3M

PIR is sensitive to hot and cold disturbances, Please note:
Avoid installing the camera where the air flow is agitated. For eg: the air outlet of the air conditioner, the heat dissipation port of the equipment, the side of the fan, the vicinity of the curtain, etc.Please do not install the camera in front of the glass or mirror. The height of the camera installation should be 2.5M-3M, the best distance of PIR trigger.

Do not install the camera upside down.
